Working Experience

Total Year of Experience: 12 Years.

Worked as a **Senior Executive** at **City Group**, from December 2018 to November 2022. Office Address: City House, Plot # NW (J) 06, Road # 51, Gulshan - 02, Dhaka-1212, Bangladesh.

Property Management Information System: City Group has a good number of buildings across the city which are using as rented and staff quarters.

Sales MIS Report: These was a demand to view the sales reports from different sales areas all over Bangladesh. On that perspective, this project was carried out. As per the priority basis, we have worked on these reports and delivered to the users.

Some salient features of this project:

1. This is a web application. So, user can access reports from any location over the internet.
2. For the cause of responsive design, reports are accessible through mobile devices.
3. Data filtering and User access on the basis of "User Sales Area".
4. User authentication through Web API.
5. Reports are accessible based on menu permission.

Skills: ASP.NET MVC · Oracle SQL Developer · Report Writing · C# · Oracle Database · Transact-SQL (T-

SQL) · Internet Information Services (IIS) · ASP.NET Web API

LC Management System: The first and foremost feature of this app is a Dashboard and Approval Process. Behind the scene, keeping a matrix of users, this application is facilitating the user to do approval some kind of vouchers.

Tools and Technology: Angular, JavaScript, C#, .Net, RESTful Web API, JIRA, Git, Oracle Database.

Worked as an **Analyst Programmer** at **Amber Software Solutions Ltd**, a concern of **Amber Group**, from March 2016 to August 2018. Office Address: Zohurul Tower, House # 9, Road # 113/A, Gulshan-2, Dhaka. Corporate Office: House 2, Road 9, Block G, Banani, Dhaka.

At my current company, I was involved at every phase of software development from requirement collection to make it Live.

Main Duties and Responsibilities

- A. Technical Requirement collection from Prospective client.
- B. Writing SRS and designing prototypes.
- C. Working with System Analyst to make business requirements to Software Requirements
- D. Participated database design from the software requirements.
- E. Distribute and split the entire module to small workable tasks.
- F. Assigning task with timeline to team mate.
- G. Report design using Telerik Reporting Tools.
